

# Liberty Theatre

WEeping WATER, NEBRASKA  
Friday and Saturday, June 22nd and 23rd

**THE WINNING OF BARBARA WORTH**  
Produced by HENRY KING  
Starring RONALD COLMAN and VILMA BANERLY  
Adapted by FRANK MARSH  
Screenplay by BARCLAY DEL WYCH  
With THEATRE COMPANY

Men accomplish miracles for women like Barbara Worth. For her, men conquered the menace of the desert and made it fertile for humanity; for her, men risked their lives and fortunes; for her, men strived, and dared, and hated.

MILLIONS HAVE READ THE BOOK; MORE MILLIONS WILL SEE THE PICTURE

## Farm Bureau Notes

L. R. SNIPES, Agent

**A Big Ditch and A Broken Binder**  
It will soon be harvest time and binders will be clicking away in every wheat field. It may be that the binder will quit clicking suddenly when you attempt to cross the big ditch back on the west eighty. More than one binder frame is broken each year in crossing ditches, and that is not the worst feature about the big gully.

The first thing we know the little ditch has become a big gully. If this has already happened it is probable that the soil saving dam is about the only thing how. The soil saving dam can be used to stop gulleys almost any size. It is simply an earth dam built across the ditch with a drainage tube placed below it. The flood coming down the ditch is stopped by the dam and the silt settles out.

Several demonstrations will be conducted this year in this county showing how these dams are constructed. If you have a ditch which is getting beyond control with ordinary means you should attend one of these demonstrations.

**Woman Extension Worker in Cass County**  
Another extension worker can be found at the home of Mrs. J. H. Smith, near the town of Cass.

**Milk-Fattened Buff Orpington BROILERS**  
at the  
**Markland & Fleming Dairy**  
Fresh MILK and CREAM  
DELIVERED DAILY

make rugs stay put and prevent many an accident. The anchor is in reality nothing more than a narrow strip of composition material, cut a trifle shorter than the width of the rug, and attached to either end, by a piece of strong webbing attached to the rug.

## Plattsmouth

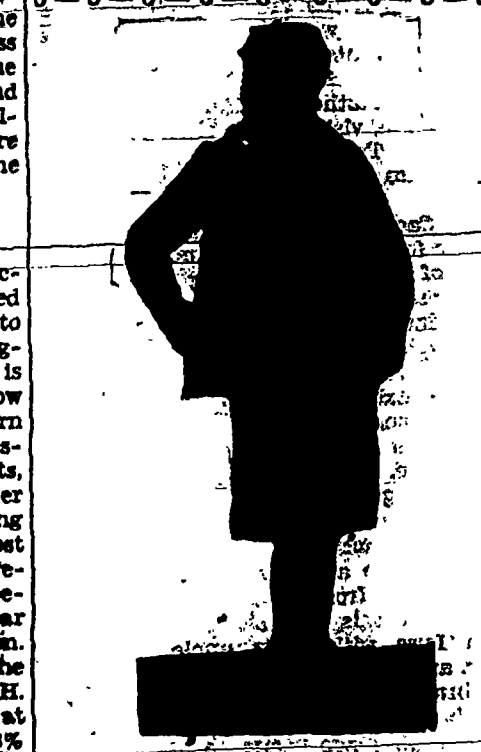

(From The Journal)  
While highly complimenting Dr. B. B. Davis on his skill as a surgeon and his standing in the profession, and holding that the question involved did not go to his qualifications, the supreme court Wednesday upheld the jury verdict of \$5,000 secured against him in Lancaster county on complaint of Leroy Stohman, former Louisville young man. The latter was a patient who had to be operated on for infected thigh and ankle. Shortly after Dr. Davis operated on him his own health broke down and he turned the patient over to his son, who had been in practice three or four years. The doctor was away recuperating for several months. Later Dr. Lord was called in. Stohman says he has an immovable foot and a shortened ankle, and blamed it on Dr. Davis' abandonment of the case without notice to him. The supreme court says that the law is that a physician or surgeon who leaves or abandons his patient in a critical stage of disease, without reasonable notice to enable the patient to secure another medical attendant, when the giving of such notice is reasonably possible, is guilty of culpable dereliction of duty, and damages are occasioned thereby, and he is liable therefor.

The Fred G. Morgan family have received the announcement of the death at Verdell, Neb., of Wm. Thierolf, 15-year-old son of Mr. and Mrs. Omer Thierolf, residents of that locality. The young man was engaged in driving a team attached to a hay rake, and the horses becoming frightened ran away and the boy was dragged some 300 yards before he could be rescued, and the injuries received resulted in his death. The young man is a nephew of Mr. and Mrs. Albert Thierolf of Utica, Neb., the latter a sister of Mrs. Morgan. The family is well known here and the news of the death of the young man brings great regret among the friends in this locality.

The wedding of one of the popular young ladies of Union and one of the well known young men of this city occurred on Wednesday evening, June 13, at Union. The contracting parties were Miss Mildred Clark and Edgar S. Newton of this city, and the wedding ceremony was performed at the home of the bride's mother in Union and was witnessed by Mr. and Mrs. Paul Long, of Mynard; the latter a sister of the groom. The bride is the daughter of Mrs. Wm. Clark, of Union, and was born and reared to womanhood in that community, where she is known and loved by a large circle of friends. The groom is the son of Mrs. Adah Newton of this city, and has grown to manhood in our city, and where he is employed at the present time in the local Burlington shops, and is a young man held in high esteem by those who know him. Mr. and Mrs. Newton will make their home in this city.

James M. Teegarden and H. A. Croder, two of the well known residents of Weeping Water, were in the city Friday visiting with friends, and attending to business matters.

## VERY LATESTS

Remember way back when beading was used to finish the blouse seams and rows and rows of insertion would themselves into the intricate designs? Today we have a smart refinement of both in the open work seams that trim so many fashionable frocks.

This trimming may be used in a number of ways. Yokes and sleeves set in with bar, fagoting are very smart. Alternate satin and dull surfaces of material, or several shades of crepe de chine or georgette set together with fagoting are always effective. Or one may use the open seam to relieve the plainness of the ensemble underblouse in the manner shown by the above trim little black satin suit worn by Dorothy Gulliver, one of 1928's Wampus Baby Stars.

With a bit of patience and bar fagoting almost any clever woman can give a plain, uninteresting dress a French hand made effect that adds dollars and dollars to its appearance.

**Don't Go To The Head**  
From the police station, flocks and flocks of people are being kept out of the city square, and we have the dotted hat. Over the hat are the straw and the straw hats.

sprinkle themselves—let dots, fall applied, dots printed or embroidered in heavy floss, according to the fabric of the hat. And perhaps the best reason for their vogue is the fact that they are sponsored by the best of the Parisian milliners.

**The Return of the Linen Shoe**  
For sports and summer costume nothing is more welcome than the new linen shoes that are so cool and comfortable. The latest models for sport wear arrive in rough finished tan linen with tan leather trimmings to match. For afternoon costumes the favorite is a dainty strap slipper of smooth lines that resemble fine suede.

**For The Dressy Summer Hat**  
Large droopy hats of hair braid are becoming as ever, and a most satisfactory investment for wear with chiffon and lace frocks. Tiny cap-shaped hats of fine hair braid whose transparency permits a vision of smartly waved hair are popular for summer evening wear. These two extremes, with no in-between, seem to be the forecast for the dressy summer hat.

## your Flower Garden

French Lilacs or the Common? If it were a question of buying one or two lilacs, a common variety in a bush that was heavy and strong, maybe three or four feet tall, and a French named variety only 18 to 20 inches tall, I would take the latter every time.

Now, the above may sound strange to those who do not know, but let us consider the reasons. The lilac is one of the longest lived of all the shrubs we may plant in our gardens, and once it is established it is a sure bloomer every year. But it is rather slow to establish itself. I have seen common lilacs that did not bloom until they had been established for from five to eight years, and if you attempt to move a plant of any size they may sulk on you for several years. On the other hand I have seen French lilacs that were only two feet high literally covered with bloom, and they keep right on blooming year after year. The French varieties are as long lived as the common lilacs and they grow just as large. Besides, they will give you from ten to fifty times the quantity of bloom, and the blooms are so much larger.

In purchasing the French lilacs be sure they are not budded or grafted. Common lilacs root stock. If they are you are really cheated, as within a few years the common will choke out the French and you will be the loser. Some dishonest nurserymen and some that do not know any better send them out this way and you are the loser. They must be grafted or budded upon privet stock and then by planting them deep they will produce their own roots and your plant will be satisfactory. If your lilacs are on their own roots then every root sucker that comes up around the plant will, if dug up and planted, produce just as good a plant as the original.

Lilacs have very few enemies and if you will keep them growing by cultivation and liberal watering, also giving them a good mulch of well-rotted manure in the fall, you will have very little trouble with them. They are especially valuable for hedges and for any place you need a fairly dense screen or background.

**Keeping Cut Flowers**  
There is no great secret in the fact that some folk are able to keep cut flowers so much longer than others. It's simply in knowing how, and any of you can do as well if you will just pay attention to a few little details.

In the first place most flowers seem to keep better if they are cut early in the morning before the dew is off their petals. They absorb moisture and vitality all night, and when you cut them they are full of it and will last much better. Then the sooner you get them into water the better they will be.

Another thing, plunge the stems deep in the water, as they will absorb much better in that way. If you are cutting such hard stemmed things as the roses, peonies, chrysanthemums and similar plants, split the stems with a knife an inch or so up from the cut end and the water will be much easier absorbed. After cutting flowers and placing them in water set them in a cool and preferably a darkened place for a few hours. This may not always be possible but it will help if you will do it. In cutting always cut on an angle, and cutting with a knife is considered better than with snips unless the snips are very sharp. Dull snips crush the stems and prevent them from taking water freely.

Cut flowers should never stand in a draught. This will make them wilt much faster. Neither should they stand in the sun.

Sometimes when you are given some flowers and are not able to get them into water until they have become apparently hopelessly wilted if you will try this it may help—fill the vessel you are going to put them in with hot water, about as hot as you can hold your hand in, and put your bouquet in this water. It will, many times, revive them.

**MURRAY**  
Murray was in Weeping Water last Tuesday, driving over for a few days' visit.

Harmon Nelson and son, George, were over to Weeping Water last Tuesday, taking a load of lumber with them to make some repairs on buildings on their farm.

C. M. Christensen, of Nehawka, was a visitor in Murray Tuesday where he was looking after some business matters and visiting with friends.

Harry Nelson and the family were visiting in Nehawka last Sunday, where they were guests in the home of Mrs. Gertrude Carper and Peter Johnson and families.

A. J. Hallis and the family, of Omaha, were guests in last Sunday at the home of Louis J. Hallis and family, of Murray, where all enjoyed the pleasant visit.

Ralph Amick was working in Omaha for a number of days last week with the Chevrolet Company, but on account of lack of work returned home.

Wm. Oberholts, the hustler, has completed the first coat of plastering on the new home of Wm. Reevie.

On last Tuesday Fred L. Kild and Thomas Nelson were constructing a new hay rack for G. H. Melinger.

John J. Thomas and B. H. Nelson were in Omaha Monday afternoon where they were looking after some business matters and securing some repairs for some farm machinery of Mr. Thomas.

Henry Heebner is installing a new pressure tank for the water supply at the Berger Hotel to replace the one which has been in service and had rusted out, and this new installation will again give water pressure to the hotel.

# An Invitation!

**Witness Demonstration at Any Time of the Coleman AIR-O-GAS Safety Pressure Stoves Make Their Own Gas!**

**Read It's Description Below:**  
Model No. 328—A three burner stove with roomy built-in oven, high back, mantel shelf, drip pan, and no-burn grate. Handsomely finished in baked French gray enamel and baked black Japan—nickel-trimmed splashers, drip pan, and oven-door of white porcelain. Coleman Instant Gas Starter. Regular Air-O-Gas Burner and Tank equipment. Oven equipped with special burner operated from independent generator. Oven door fitted with heat indicator.

Dimensions: Height over all, 54 inches; width 19 1/2 inches; length, with tank, 39 1/2 inches; Height of cooking top, 31 1/2 inches; cooking top, 35 1/2 x 16 1/2 inches. Oven inside measurements, 12 1/2 x 13x20 inches.

## H. L. RICHARDS

"Quality at LOWER Prices"  
Hardware, Plumbing, Heating  
Telephone 46 Weeping Water, Nebraska

The new house of G. H. Tams, east of Murray, which is being constructed by J. A. Scotton and his crew of efficient workers is now ready to receive the shingles, and will be completed by next week.

Clyde Gilmore, who is working near Louisville, was a visitor in Murray last Tuesday with his friends.

Green Pigot, the genial and efficient road man, was making some repairs on the intersection of the Red Ball highway, and the west street of Murray, one day this week.

T. J. Brandel, better known as "Jelly", and Dr. O. H. Brandel, of Los Angeles, were down near Kamp, Ill. Karp on last Tuesday afternoon fishing.

C. H. Boedeker, Jr., who returned home last week from his studies at Fairbault, Minn., following the close of the school year, visited here for a few days and then returned to continue his studies for the summer term, which will continue for some six weeks.

Elmer Yardley, living with his mother east of Murray, was in town getting a pump repaired last week.

## For The Home!

We now have in stock Sewing Machine Needles, Shuttle Tubes, and Bobbins, to fit more than one hundred and ninety different makes of sewing machines. If your old needles are dull, come to the Richards Hardware Store to get new needles.
